

## BI Solutions Portfolio: Better Business Performance Powered by Analysis & Reporting

### About Netwoven

Netwoven Inc. is a fast growing consulting and systems integration company intensely focused on helping customers gain competitive advantage by exploiting all forms of enterprise information. Led by business and technology experts, Netwoven has executed high impact programs and established a strong reference client base. Our solutions help customers achieve higher productivity, greater collaboration and deeper insight.

Netwoven's Business Intelligence Solutions power better, clearer decision making by serving up performance analysis and reporting to the greatest number of user constituencies using the full range of Microsoft PerformancePoint Services, Power Pivot and SQL Server 2008 R2 products. We help customers extract greater meaning and understanding from business data – transforming transactions, web activity and market research into business insight.

Netwoven's full range of BI services isolate and warehouse better quality data, then build cubes for multidimensional analysis and reporting. Data is consolidated, reducing duplication and allowing users to work off common sources to produce consistent analytics and reports resulting into improved business performance.

The promise of BI can now be delivered into the hands of more key business stakeholders than ever before. For executives, performance scorecards employ balanced methods to measure key corporate performance metrics. For managers, interactive analytics deliver improved visibility into customer, supply chain, sales or inventory operations. For line of business employees, enterprise reporting reaches all corners of the organization for strategic alignment.

Netwoven's specific BI services span vertical industries as well as horizontal departments such as finance, operations, sales and human resources to include:

- **Performance Management:** executive dashboards & scorecards for executives, managers, partners, suppliers or vendors using methods like the Balanced Scorecard and Six Sigma
- **Business Analytics:** OLAP interfaces for sales, supply chain or customer service data analysis
- **Enterprise Reporting:** reporting & analysis utilizing the full range of Microsoft BI technologies
- **Industry Services:** vertical-specific BI deployments analyzing bookings, billings, backlogs, customer data, or supply chain performance

## BI Solutions Portfolio | PAGE 2

Netwoven’s BI Solutions provide intuitive BI delivery mechanisms to give customers a solid foundation for interactive analysis. The productivity needs of information workers at all levels and roles are equally met – from executives to analysts. Sales analysis, supply chain analysis, financial performance analysis, customer service analysis, healthcare record analysis, and market segmentation are just some of the projects Netwoven has managed.

### BI Technology Services

Our full range of BI Technology Services cover the design and building of data warehouses, multidimensional cubes and much more using Microsoft PerformancePoint Services 2010, Power Pivot and SQL Server 2008 R2:

- Custom reporting using SSRS
- Analytic Reporting using Power Pivot
- ETL development using SSIS
- OLAP development using SSAS
- KPI and Scorecard development using PerformancePoint Server
- Data warehouse design & implementation

### BI Maintenance Services

Netwoven’s BI Solutions are never designed as a snapshot in time. Our seasoned technical experts realize that flexibility, scalability and extensibility mean that a customer’s applications and infrastructure must evolve as the business changes and grows. Additional reports, more ETL – Netwoven BI customers are offered the option of availing themselves of Maintenance Services to ensure that our BI Solutions not only maintain relevancy but improve over time.

### BI Managed Services

Netwoven has the expertise and experience to manage and enable Microsoft applications to run as an outsourced operation. The company’s Managed Services model is the best approach to outsourcing, providing BI expert skills and technical competencies with support tailored to customer requirements. Managed services play a vital role in reducing operating costs, establishing significant improvements in efficiency and ensuring profitable growth through delivery of exceptional customer service. This approach provides the control and flexibility over their BI applications without either the pain or cost of running them – at far less expense than their organization could manage alone. We provide the following BI Managed Services:

- Backup and Restore for Relational and OLAP Databases
- Database Health Check
- Disaster Recovery
- Performance Tuning
- Ongoing Database Maintenance

### BI Expert Staffing

Our team of experts can help find the right contract candidates for your toughest BI projects. We help you meet all your on-site contract staffing needs intelligently by selecting and interviewing the best fit and high quality for an available position. Netwoven can source senior BI system architects, OLAP, reporting and data warehouse/ETL experts for various BI technologies.
