

ECM Solutions Portfolio: Collaboration and Knowledge Sharing Connect the Enterprise using SharePoint 2010

About Netwoven

Netwoven Inc. is a fast growing consulting and systems integration company intensely focused on helping customers gain competitive advantage by exploiting all forms of enterprise information. Led by business and technology experts, Netwoven has executed high impact programs and established a strong reference client base. Our solutions help customers achieve higher productivity, greater collaboration and deeper insight.

As defined by Gartner Research, Enterprise Content Management (ECM) represents both a vision and a framework for implementing technologies that not only manage important documents and other unstructured information, but also extract higher value from the disparate content formats that exist throughout an enterprise.

Netwoven has unmatched expertise in ECM using the Microsoft SharePoint 2010 platform – the acknowledged market leader.

Netwoven's ECM Solutions help organizations manage their vast stores of unstructured content to protect vital information assets, reduce information overload, and foster collaboration by connecting key audiences.

A company's content is only as valuable as the organization's ability to access its knowledge, mine its value, and then to put it to productive use most efficiently. ECM is increasingly becoming part of the critical IT infrastructure because of its ability to aid knowledge retention and compliance – now C-level executive concerns. The emergence of Web 2.0 and mobile technologies are empowering business users, raising their expectations for richer, more intuitive ECM applications.

Separate ECM Disciplines Integrated by SharePoint 2010

Netwoven's ECM Solutions unlock the vast wealth of knowledge stored in a customer's network drives, web sites and physical files. We can also assist you in migrating your content from various repositories such as network drives, eRoom, Lotus Notes, Exchange Public Folders and Documentum. Large companies pursuing an overall content management strategy can benefit from Netwoven's ECM Solutions that not only meet their immediate needs, but also can be readily and cost-effectively scaled throughout the entire organization.

Netwoven consultants are well versed with the latest features and functions of SharePoint including Taxonomy Store, PerformancePoint Services for Business Intelligence, Social Networking and FAST Search.

ECM Solutions Portfolio | PAGE 2

Netwoven’s specific ECM Services include:

- **Portal & Collaboration**—Web-based workspaces personalized for employees, customers, vendors and partners
- **Document Management**—Systems that organize, store and protect published and controlled content with check in /out and version management capabilities
- **Records Management**—Systems for policy-based retention with audit trails and eDiscovery capabilities
- **Web Content Management**—Systems that deliver localized web content to external users including prospects, customers, and partners
- **Enterprise Search**—Functionality that improves access and reuse of business information and minimizes duplication
- **Social Networking**—Web applications that foster connections between internal teams, across departments, or with external suppliers.

ECM Technology Services

Netwoven is a leading Microsoft Certified Solutions Provider in designing and deploying custom architectures, web applications and related services on SharePoint 2007/2010. Our teams design and develop all necessary components for the success our ECM Solutions – including:

- Custom Web Part Development
- Custom Search Development
- Template Design and Development
- Custom Workflow Development
- Custom Integration Using Business Data Catalog

ECM Maintenance Services

Our seasoned technical experts realize that flexibility, scalability and extensibility means that a customer’s applications and infrastructure must evolve as the business changes and grows. From ongoing search refinements to performance tuning – Netwoven Maintenance Services ensures that our ECM Solutions not only maintain relevancy but improve over time.

ECM Managed Services

Netwoven has the expertise and experience to manage and enable SharePoint 2007/2010 applications to run as an outsourced operation. Our Managed Services play a vital role in reducing operating costs, establishing significant improvements in efficiency, and ensuring profitable growth.

Customers retain the flexibility to implement and manage key projects, providing the best of both worlds: control and flexibility over their ECM applications without either the pain or cost of running them. We provide:

- Ongoing SharePoint Maintenance
- Backup and Restore Services
- Disaster Recovery Services
- Performance Tuning Services

ECM Expert Staffing

Our team of experts can help find the right contract candidates for your toughest ECM projects. We help you meet all your on-site staffing needs intelligently by selecting and interviewing the best fit and high quality for an available contract position. Netwoven can source senior SharePoint 2007/2010 developers, administrators and functional experts for you.
