

**Netwoven, a professional services and consulting firm with a dedicated Life Science practice, cordially invites you for this first in a series of FREE seminars on helping Life Science companies in the areas of Document Control, Change Control and Quality systems. Below are the details of the event:**

**Event Topic:** Managing Change Controls in your Quality System  
**Date Of Event:** May 12, 2009  
**Time Of Event:** 9:00am – 12:00pm (Lunch will be served after the event)  
**Location:** Microsoft Office in Mountain View, CA

Participants will learn how to build a process model for the document control process, determine important inputs and outputs of the process, identify key risks associated with document control failure processes and identify systematic solutions to eliminate process failures.

The event will be delivered by Industry veterans Richard Rush and Niraj Tenany.

#### **About Richard Rush**

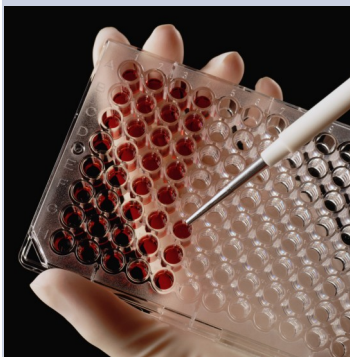

Richard is an experienced medical device consultant and executive with over 15 years in the industry, working in companies ranging from small early stage start-ups to large established ones. His work in Quality, Compliance, Manufacturing and Regulatory Affairs, has led him to a broad and practical understanding of quality systems.

Richard works with small and growing companies to establish Quality Systems that prepare them for long periods of expansion. Formerly a Vice President at a leading medical device manufacturer, Richard has held leadership positions at several internationally respected companies. He has a Masters degree in Business Administration (UC Berkeley) and a Bachelor of Science degree in General Engineering (UI Urbana).

#### **About Niraj Tenany**

Niraj is Chief Executive Officer and a Co-founder of Netwoven, responsible for the strategic vision and direction of the company.

Niraj has been working with Fortune 500 companies to implement large-scale enterprise systems for the past 15 years. He has worked with companies like Microsoft, Accenture and Oracle in senior management capacity helping clients in Life Sciences and other industries design and implement systems for collaboration, document management, business intelligence and business process management. Niraj holds a BS in Computer Science from Birla Institute of Technology, India, an MS in Computer Science from State University of New York (SUNY), and an MBA from Duke University's Fuqua School of Business.

#### **About Netwoven**

Netwoven Inc. is a leading Microsoft solutions provider with services that enable improved collaboration, business intelligence and business process management.

Founded in 2001 by senior-level executives from Microsoft, Oracle and Intel, Netwoven powers more intelligent enterprises by connecting people, processes, and information. We help medium to large enterprise customers unlock the hidden value of their information assets and derive rapid return on investment from their technology.
