

SharePoint Multi-File Action Utility

Improve efficiency & productivity by working on groups of files in SharePoint 2007

Key Features

- Silverlight Based
- Ability to drag and drop files to be downloaded
- Extendible Architecture to add other functions
- Available for both SharePoint 2007 and 2010

SharePoint Document Libraries provide a great way to work with individual files. However, they lack certain features when working with a group of files. The Multi-File Action (MFA) tool from Netwoven compliments SharePoint's rich capabilities and makes it easy to work with groups of files in a document library. It is a SharePoint utility that integrates well with the SharePoint framework to provide the following capabilities:

- Ability to download a group of files as a zip file

Below is a summary of the key features:

- The Silverlight control that enables these actions is accessible from standard document library toolbar Action menu
- The feature can be activated or deactivated per Site Collection
- The Silverlight control allows users to drag and drop files and folders from a document library that they wish to download
- Users can add or remove the selections
- Users can drag and drop entire folder structures for download
- Users can select any number of files to download or email. Appropriate algorithm is applied to ensure the integrity of the download

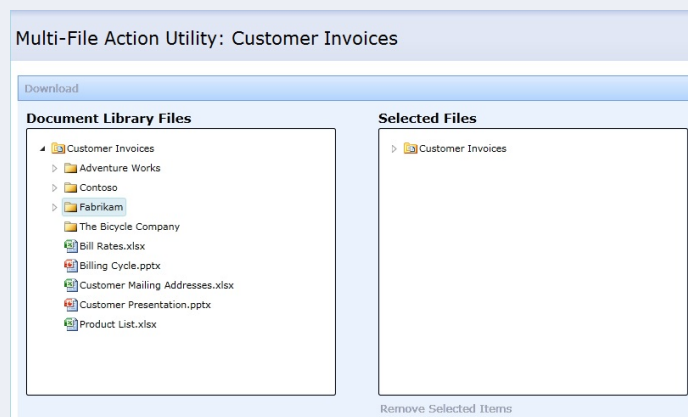

About Netwoven

Netwoven Inc. is a growing consulting and systems integration company intensely focused on helping customers gain competitive advantage by exploiting all forms of enterprise information.

Led by business and technology experts, Netwoven has executed high impact programs and established a strong reference client base.

Our solutions help customers achieve higher productivity, greater collaboration and deeper insight.
