

About Netwoven

Netwoven is a leading consulting and systems integration firm singularly focused on helping clients get the most out of the rapidly exploding information in their enterprise – both structured information as well as unstructured information.

As experts in the area of information and collaboration management, Netwoven can organize and mine vast amounts of information in new, creative ways to tap employees' knowledge, mine competitive data, and create customer insights.

Netwoven's solutions in information and collaboration management result in higher quality decisions, reduced costs, enhanced teamwork, and better risk and compliance management.

Netwoven's scope of work includes:

- Portals and Collaboration
- Document management
- Records management
- Enterprise search
- Enterprise Social Networking
- Business Process Management
- Business intelligence

Introduction

Welcome to the Netwoven SharePoint expert series events. This series is exclusively created to provide the attendees with field best practices for implementing Enterprise Content Management (ECM), Business Intelligence (BI) and Business Process Management (BPM) solutions. The events in these series are focused on providing the following information:

- Review the features and functions of SharePoint for ECM, BI and BPM
- Review best practices from the field for implementing ECM, BI and BPM solutions
- Discuss the project management, architecture and Governance issues for rolling out ECM, BI and BPM using Microsoft SharePoint

These events are created and delivered by experienced practitioners who have extensive experience with the domain and Microsoft SharePoint.

After attending these expert events, you will be able to

- Define and implement Enterprise Content Management solutions using SharePoint
- Define and implement Business Intelligence solutions using SharePoint
- Define and implement BPM Solutions using SharePoint

Audience

Our audience for the Netwoven Expert Series is IT Project Managers, IT architects, and Business project managers responsible for Enterprise Content Management, Business Intelligence and Business Process Management initiatives.

It is mandatory that attendees meet the following pre-requisites:

- Working knowledge of SharePoint 2007
- Working knowledge of document management features of SharePoint
- Working knowledge of Workflow capabilities of SharePoint

Sample Agenda

Below is a list of topics covered in the Document Management Expert Event:

- Challenges in managing content in the enterprise
- Netwoven's Document Management Framework and Best Practices
- Implementing the framework using Microsoft Office SharePoint Server
