Portals can deliver great productivity gains for organizations of all sizes. The challenge for small and medium companies – how to implement portal technologies quickly and cost effectively?

Introducing Portal in a Box

Using our proven best practices and off-shore development staff, Netwoven has developed an implementation methodology that can implement a turnkey portal solution based on Microsoft Office SharePoint Server in 3 to 5 weeks for under \$25,000 in professional services.
*Some limits apply.

Using pre-defined templates, our local team of experts' works directly with you to organize the portal structure, menus, search taxonomy, and content desired.

A site definition document is created allowing our team of talented offshore developers to implement a SharePoint Portal delivered to your requirements.

The Benefits

Our local team provides you best practice experience to organize your portal the way you want it. Our offshore team delivers quality portal development for a fraction of the cost of local portal development.

Note: Portal in a box is designed for organizations not requiring in depth customization of Portal Look and Feel or function.

It is designed for organizations who value time to market and leveraging as much "Out of the Box" as possible.

Once Portal in a Box is implemented, an organization can always implement advance customizations or new functionality in a phased approach for new portal releases.

*Limitations

Portal in a box is designed to take advantage of as much "Out of the Box" functionality of SharePoint 2007 as possible.

Portal in a Box is limited in scope to 5 business areas. Commonly customers choose: HR, Sales, Marketing, Finance, and Operations.

A template for Portal in a Box will be limited to simple customization.

Portal in a Box does not provide for integration of other Back-end systems. These may be integrated with additional investment.
