NETWOVEN HIRES SR. TECHNICAL DIRECTOR FROM SAP
Technology Leader Innovates, Integrates SAP and Microsoft Solutions

PLEASANTON, CA, Sept. 13th, 2006 -- Kirpal Singh Khalsa, former Supplier Relationship Management (SRM) Manager at SAP, and co-founder of Brightmail, a pioneer in the anti-spam space acquired by Symantec, has joined Netwoven as Sr. Technical Director.

Khalsa will lead development teams in the U.S. and India, focusing on Portals, Enterprise Content Management, Document Management and Business Process Integration for enterprises such as, Microsoft, eBay, OSISOFT, Applied Materials, Altera, Infinera, Kyphon, Home Depot, and Coca Cola.

"I am delighted to be working with the Netwoven team and its customers", says Mr. Khalsa. "They are a perfect fit for business applications in my field of expertise. Customer desire to integrate Microsoft solutions and SAP solutions are an ideal match for my experience and expertise. These solutions will help our customers communicate and collaborate better across their own enterprise and with partners and customers."

At SAP, Khalsa managed teams developing applications for Auctioning, Bidding, Purchase Order (PO) management and Catalog Management, and portal applications that provided access to supplier related data. Prior to SAP, Khalsa not only co-founded Brightmail, he held senior architecture and management positions at Zaplet, a Kleiner Perkins funded startup; contributing to email, security, general infrastructure and application design. He also worked in senior architect capacity at Lotus Development and Tandem.

According to Niraj Tenany, President and CEO of Netwoven, "We're glad to have Mr. Khalsa join our Technical Leadership team. His understanding and expertise of .NET, Java and SAP technologies positions us for future growth enterprises in healthcare, retail and manufacturing industries."

About Netwoven

Netwoven Inc. is a privately held technology and systems integration company founded in June 2001 by individuals from Microsoft, Oracle and Intel. The company's business model leverages development centers in the United States and India that provide Netwoven clients with high-quality implementation services with high return on investment. The company provides both off-site and on-site services and enjoys significant client relationships in the United States.
