INTEGRATION EXPERT FROM MICROSOFT JOINS THE NETWOVEN TEAM
Technology Leader Innovates, Integrates Microsoft and SAP Solutions

PLEASANTON, CA, Oct 2nd, 2006 – Mark Bessett, a former architect with Microsoft Consulting Services has joined Netwoven as Technical Director.

Bessett will lead development teams in the U.S. and India, focusing on Portals, Enterprise Content Management, Document Management and Business Process Integration for enterprises such as, Microsoft, eBay, OSIsoft, Applied Materials, Altera, Infinera, Kyphon, Home Depot, and Coca Cola.

At Microsoft, Bessett specialized in integration technologies, leading architecture efforts across several industries. Among his achievements were projects in Retail, Communications, Healthcare & Insurance, Power, Government, Aerospace, High Tech and others.

While at Microsoft, Bessett implemented highly abstracted SOA messaging brokers to facilitate loose coupling of large scale integrated system. These systems utilized an open model whereby multiple vendors could supply a variety of services to meet the customer's needs. According to Bessett, "these types of architecture represent the state of the art in integrating large scale enterprises."

Mr. Bessett has also previously held key aerospace engineering positions with defense contractor Lockheed Martin working on large scale spacecraft and spacecraft-to-ground integration programs and architectures.

According to Niraj Tenany, President and CEO of Netwoven, "We're glad to have Mr. Bessett join our Technical Leadership team. His understanding and expertise of .NET technologies, knowledge of Microsoft products and solutions and knowledge of the Microsoft sales model helps us get closer to delivering value based on Microsoft products.

About Netwoven

Netwoven Inc. is a privately held technology and systems integration company founded in June 2001 by individuals from Microsoft, Oracle and Intel. The company's business model leverages development centers in the United States and India that provide Netwoven clients with high-quality implementation services with high return on investment. The company provides both off-site and on-site services and enjoys significant client relationships in the United States.
