

NETWOVEN RECEIVES 2015 CLOUD COMPUTING EXCELLENCE AWARD

Company's Jive to SharePoint Migration Honored for Innovation and Ability to Reduce Annual Licensing Costs by \$500K

MILPITAS, CA – August 25, 2015 – [Netwoven Inc.](#), announced today that [TMC](#), a global, integrated media company, has named the company's Jive to SharePoint Migration as a 2015 Cloud Computing Excellence Award winner. The company was specifically honored for its ability to migrate content from Jive to SharePoint--using no commercially available tools--while reducing their customer's annual licensing costs by approximately \$500,000.

The Cloud Computing Excellence Award, presented by [Cloud Computing Magazine](#), recognizes companies that have most effectively leveraged cloud computing in their efforts to bring new, differentiated offerings to market. Netwoven was singled out from among this year's competitors for demonstrating unique talent and creativity to migrate Jive and many other artifacts. Rich Tehrani, CEO, TMC, refers to Netwoven's achievement as, "bringing innovation and excellence to the market, while leveraging the latest technology trends."

Netwoven's award-winning migration involved defining a collaboration strategy, an information architecture and governance plan for the target Office 365 SharePoint system, coupled with a migration strategy for the content. The successful completion of the project resulted in a new collaboration strategy for content unification and cloud deployment including:

- Simplifying content creation and retrieval
- Consolidating technical support skills
- Reducing total-cost-of-ownership (TCO) via Platform Maintenance/Upgrade cost reductions
- Increased Information Worker Productivity for 14K+ users

“More and more companies are moving to the Microsoft Office 365 cloud and consolidating their systems from Jive, Documentum, Opentext and other systems to Office 365 with SharePoint,” said Niraj Tenany, President and CEO of Netwoven. “With the maturing of the cloud market, it’s extremely important to develop successful and repeatable methods for migrating platforms such as Jive to enable organizations with the promise of cloud scalability and access. Netwoven has developed the appropriate processes and tools to facilitate the process. We are humbled to receive the Cloud Computing Excellence Award from TMC.”
