NETWOVEN INC. Achieves Microsoft Gold Cloud Productivity Competency

Netwoven Inc. demonstrates best-in-class capability and market leadership through demonstrated technology success and customer commitment.

Milpitas, California, USA — March, 17, 2016 — Netwoven Inc., today announced it has attained a Gold Cloud Productivity competency, demonstrating a “best-in-class” ability and commitment to meet Microsoft Corporation customers’ evolving needs in today’s dynamic business environment. Netwoven’s achievement sets them in the top one percent of Microsoft’s entire global partner ecosystem.

Microsoft’s Cloud Productivity customer solutions include Office 365, which allows corporations of any size to take advantage of pay-as-you-go pricing and use key business productivity tools such as Excel, Outlook, Word, and other Office products on-the-go.

According to Netwoven’s Chief Executive Officer, Niraj Tenany, Gold Cloud competency provides proven solution expertise and skills, as well as business focus, with customer references to show for it. “We can now provide more reliable customer service through deep technical support and advisory services at each stage of the sales cycle.

“By achieving a gold competency, partners have demonstrated the highest, most consistent capability and commitment to the latest Microsoft technology,” said Phil Sorgen, corporate vice president, Worldwide Partner Group at Microsoft Corp. “These partners have a deep expertise that puts them in the top one percent of our partner ecosystem, and their proficiency will help customers drive innovative solutions on the latest Microsoft technology.”

To earn a Microsoft gold competency, partners must successfully complete technical exams (required for Microsoft Certified Professional attainment) to prove their level of technology expertise, and then designate these certified professionals uniquely to one Microsoft competency, ensuring a certain level of staffing capacity. They also must submit customer references that demonstrate successful projects, meet a revenue commitment (for most gold competencies), and pass technology and/or sales assessments.

“This Microsoft Gold Cloud Productivity competency showcases our expertise in and commitment to today’s technology market and demonstrates our deep knowledge of

Microsoft and its products,” said Niraj. “We plan to accelerate our customers’ success by serving as technology advisors for their business demands.”
