

Netwoven Inc. Achieves Microsoft Gold Application Development Competency

Milpitas, California, USA — December 05, 2018 — Netwoven Inc., a leading Microsoft Cloud Solution provider, announced it has achieved Microsoft Gold Competency for Application Development. Netwoven attained it for demonstrating “best-in-class” expertise, to meet the evolving needs of Microsoft customers in today’s cloud-first environment.

Netwoven Inc. is among the few independent IT service providers to acquire the Gold Competency for Application Development. This prestigious recognition from Microsoft puts Netwoven in the exclusive club of partners in the region.

“Application Development competency validates our expertise in providing more reliable customer service through our advisory and deep technical skill set”, said Niraj Tenany, President and CEO. “We are committed to support our customers and drive success with them by solving their most pressing business and technical challenges.”

Gold Application Development competency will help Netwoven deliver on business applications using PowerApps, Flow, CDS, and Azure Custom Development.
