

# Netwoven Expands its Data and AI Capabilities

New capabilities offer customers an opportunity to develop innovative digital services and drive business outcomes

**Milpitas, California, USA — July 8, 2019** — Netwoven Inc., a Microsoft Gold partner and a leader in technology consulting services has today announced the expansion of its Data and AI practice. The announcement comes at a time when organizations face increasing demand from their customers to innovate faster and provide more products and services. These can only be developed by harnessing the power of data.

“Organizations that generate business value from their data successfully will outperform their peers. A recent survey showed organizations who implemented a Data Lake are outperforming similar companies by 9% in organic revenue growth. The much-needed expansion of our Data and AI capabilities offers our customers exemplary opportunities to drive their business forward with the power of Data and AI” – says Niraj Tenany, Chief Executive Officer, Netwoven.

Netwoven has already forged partnerships with companies like Microsoft, Cloudera, Databricks and Snowflake to help customers modernize their Data and AI capabilities.

The Milpitas based company further segregated its Data Science and AI offerings in the following areas for companies to get started on their Big Data journey:

Data Engineering	Data Visualization & BI	Data Science and AI	IoT
<ul style="list-style-type: none"> <li>• Data Modernization</li> <li>• Data Quality Management</li> <li>• Data Governance and Master Data Management</li> <li>• Data Migration and Integration</li> <li>• Azure Cosmos DB Services</li> <li>• Azure Databricks Services</li> <li>• Azure Data Lake Services</li> </ul>	<ul style="list-style-type: none"> <li>• Data Visualization Consultation</li> <li>• Data Visualization Implementation</li> <li>• Self Service Data and Insights Discovery</li> <li>• BI Visualization Workshop</li> </ul>	<ul style="list-style-type: none"> <li>• Machine Learning</li> <li>• Data Science Tooling</li> <li>• Cognitive Computing</li> <li>• Deep Learning</li> </ul>	<ul style="list-style-type: none"> <li>• IoT Strategy and Framework Consulting</li> <li>• IoT Engineering and System Integration</li> <li>• IoT Managed Services</li> </ul>
