

# Netwoven Joins Microsoft Intelligent Security Association

Netwoven has been accepted by Microsoft for the Microsoft Intelligent Security Association (MISA), an ecosystem of Independent Software Vendors and Managed Security Service Providers that have integrated their solutions with Microsoft technologies to better defend against increasing cyber-threats.

**MILPITAS, Calif. (PRWEB) September 24, 2021** – Netwoven, a global leader in offering digital transformation solutions using Microsoft Azure, today announced that it has been accepted by Microsoft for the Microsoft Intelligent Security Association (MISA), an ecosystem of independent software vendors and managed security service providers that have integrated their solutions with Microsoft technologies to better defend against increasing cyber-threats. MISA membership enables close collaboration between members and demonstrates Netwoven’s long-term commitment to the Microsoft relationship to bring better security solutions to customers.

“For more than two decades, Netwoven’s unwavering commitment to work along with Microsoft has been helping drive digital transformation for organizations around the world”, said **Niraj Tenany, Chief Executive Officer, Netwoven, Inc.** “As a Microsoft Gold Partner, we have been consistently raising the bar for Security, Compliance, and Identity management with our integrated solutions, as our mission is to provide optimal security for our shared customers and deliver impactful, customer-centric security solutions to the market.”

Netwoven has extensive experience and expertise in helping companies protect their sensitive and mission-critical information with Microsoft Information Protection

solution to establish the fine-grained access control, encryption strategies, and sensitivity labels to their DLP objectives while enhancing collaboration efficiency.

Netwoven utilizes its expertise in Microsoft's security products to better defend against cyber security threats with Intelligent Security Solutions, Identity & Access Management, Threat Protection, Information Protection Management, Security Management, Cloud Infra Management, and Endpoint Management. Netwoven's service offerings include Advisory services, Discovery & Planning services, Implementation services, Managed services, and Adoption & Change Management (ACM) services.

"The Microsoft Intelligent Security Association has grown into a vibrant ecosystem comprised of the most reliable and trusted security software vendors across the globe. Our members, like Netwoven, share Microsoft's commitment to collaboration within the cybersecurity community to improve our customers' ability to predict, detect, and respond to security threats faster," said **Maria Thomson, Microsoft Intelligent Security Association Lead.**

## About Netwoven
